

# LEMBAGA PEMULIHAN DAN PENGELOLAAN LINGKUNGAN INDONESIA

Head Office: Jl. Cempaka Putih Tengah III No. 6A Jakarta pusat

To Whom It May Concern

Subject : Proof of Market Confirming in/or within the Republic of Indonesia

With reference to our letter issued with the code and date (S. 197/INN/LP2LI/V/2020 issued in Jakarta 27<sup>th</sup> of May 2020), and with reference to **DERMA-CURE KMWSH** consortium, letter issued with the code and date (**REFERENCE CODE:** Consortium/DC-KMWSH A-101/05.June.2020 (REPLY)).

There are rules for what factors actually work to prove a market. Like so many things with business planning, it is going to be different for every different business. for the Covid 19 vaccine and medicines development and manufacturing, what I can tell you though, is things I have seen in business plans of **DERMA-CURE KMWSH** consortium, can work. Because the type of vaccine that is currently being developed by them will be long-effective and low-cost compared to what the market declares, in addition to global reports confirming that this market will continue from the year 2020 to 2026. In addition, the project will produce other supportive pharmaceutical industries, reassuring that there are many sources of cash flow.

Also, the **DERMA-CURE KMWSH** consortium, of this project/projects has planned to establish a factory for small electric airplanes (several types with low operation costs) with a capacity of 2 up to 8 passengers and a useful payload of 100kg up to 1000kg, which confirms to everyone that this alliance has a vision and a prior understanding of what the Indonesian market and the surrounding countries need, in terms of difficulty and cost in transporting people and goods between the islands that reach Their number is thousands, that's to what the market declares, in addition to global reports confirming that this market will continue from the year 2020 to 2030.

The **DERMA-CURE KMWSH** consortium, will also use a new type of smart building to build its facilities, which is a new technology innovated by the same consortium, a type of new construction that is dry and does not result in any construction waste, as it is resistant to fires, earthquakes up to 9.8 Richter and all conditions of nature, and it is quick in implementation and low in cost.

Note: This document was issued to support this project as a smart investment projects that consider the requirements of the Indonesian market in terms of high quality and low-cost products and services.
